

RECENT PUBLICATIONS RELATING TO THE HISTORY OF ASTRONOMY

Books, Pamphlets, and Special Issues of Periodicals

Astronomical observatories and institutions in Italy. II. [Proceedings of the] eighth annual meeting on the history of astronomy, Napoli, March 29–30, 1996. Edited by E. Proverbio. Cremona, Monotipia cremonese, 1997. 513–780 p. illus., facsims., maps, plans. (Società astronomica italiana. Memorie, v. 68, n. 3, 1997)

Contents: Braccesi, A. Tra ricordi e documenti: radioastronomia e cosmologia a Bologna, 1959–1969.—Proverbio, E. Sul Gabinetto meteorologico e sulla Specola meteorologica e astronomica di Pietro Moscati in Milano.—Carbone, L., G. Cardone, and S. Mancuso. Il fenomeno della variazione della latitudine a corto periodo: gli studi di Arminio Nobile e la controversia con Ernesto Cesàro.—Balestrieri, R. Francesco Porro e l'Osservatorio meteorologico e astronomico dell'Università di Genova.—Tinazzi, M. The published and unpublished works of Pietro Cossali, astronomer, meteorologist, and hydraulic in the Parma University. Manuscripts and correspondence [includes a catalog]—Cristaldi, S., and A. Mangano. On some letters addressed to Annibale Riccò regarding the monument dedicated to the memory of Angelo Secchi.—Colavita, C., and C. Mataix. Galileo e l'Inquisizione in Spagna.—Schettino, E. Il calore radiante della Luna: una prova per l'identità della radiazione termica e luminosa.—Manara, A. Controversie e curiosità sulla nomenclatura dei piccoli pianeti.—Badolati, E. Sopra una formula di Machin.—Banfi, V. Epicycles, from Hipparchus to Chandrasekhar.—Arrighi, G. Su alcune tavole astronomiche della Bibliot[e]ca nazionale braidense di Milano.—Vlora, N. R., and R. Falagario. Il calendario biblico.—Barlai, K. Remarks on the orientation of the medieval church at Kána, Hungary.—Romano, G. Deviazioni negli orientamenti del tipo Sol Aequinoctialis.—Codebò, M. Nuove indagini a Colle Joben (BZ).—Codebò, M. Prime indagini archeoastronomiche in Liguria.—Danholi Neves, M. C. The universe of Ptolemy revisited.—Bònoli, F. L'astronomia a Bologna e il Catalogo del Museo della Specola.—Calabrese, V. L'archivio storico-scientifico dell'Osservatorio astronomico di Torino – Pino Torinese. Prime considerazioni.

Chaperon, Danielle. Camille Flammarion: entre astronomie et littérature. Ouvrage publié avec l'aide de la Faculté des lettres de l'Université de Lausanne. Paris, Éditeurs Imago, 1998. 212 p. illus., map.

Contents: Introduction.—ch. 1. La muse de l'observation.—ch. 2. Les bolides oculaires.—ch. 3. Le cinématographie céleste.—ch. 4. Les ondulations des siècles.—ch. 5. La mémoire cosmique.—ch. 6. La tristesse des astronomes.—ch. 7. La mélancolie scientifique.—ch. 8. Sens exquis et sens obtus.—ch. 9. La sélection des âmes.—ch. 10. Images et mutations.—ch. 11. La lanterne à projections.—ch. 12. Le vulgarisateur irrésistible.—Conclusion.—Chronologie.—Œuvres de Camille Flammarion.—Bibliographie.

Dörr, Stephen. Der älteste Astronomietraktat in französischer Sprache: *L'Introductoire d'astronomie*. Edition und lexikalische Analyse. Tübingen, M. Niemeyer, 1998. 208 p. (Beihefte zur Zeitschrift für romanische Philologie, Bd. 209)

Drakon i Zodiak. Sbornik stateī (po materialam konferensii). Redaktor i sostavitel', È. N. Kaurov. Moskva, Izdatel' N. Z. Shvarfs, 1997g. 100 p. illus. (Paleoastronomiâ, arkheoastronomiâ, etnoastronomiâ)

Contents: Kaurov, È. N. Predislovie sostavitelei.—Kaurov, È. N. Sozvezdie Drakona: arkhaicheskâ sistema astronomiceskikh nablûdenii.—Zhitomirskii, S. V. "ÎAvleniia" Arata. Datirovka i analiz pervoistochnika.—Ershova, G. G. Zodiakal'nyi poiâs v predstavleniakh mezoamerikanâev.—Karapet'iâns, A. M. Drevnekitaiskii i drevneindiiskii Zodiak.—Raevskii, D. S. Prostranstvo i vremiâ: Zodiak i "zodiaki."—Kaurov, È. N. Prilozhenie: SETI i drevnie fsivilisatsii.

Duncan, David E. Calendar: humanity's epic struggle to determine a true and accurate year. New York, Avon Books, 1998. xv, 266 p. illus., port.

Folley, Tom. *The book of the moon.* With a foreword by Sir Arnold Wolfendale. Philadelphia, Courage Books, 1997. 128 p. illus. (part col., part fold.) (A Quarto book)

Contents: Introduction.—ch. 1. The wanderer.—ch. 2. Moonbeams and magic.—ch. 3. Key to the universe.—ch. 4. The lunar imagination, by Deirdre O'Day.

Gaspani, Adriano, *and* Silvia Cernuti. *L'astronomia dei Celti; stelle e misura del tempo tra i Celti.* Aosta, Keltia, 1997. 175 p. illus. (Le Antiche querce, 10)

Greenstein, George. *Portraits of discovery: profiles in scientific genius.* New York, J. Wiley, 1998. 232 p. illus., ports.

Partial contents: 1. The ladies of Observatory Hill: Annie Jump Cannon and Cecilia Payne-Gaposchkin.—3. The magician: George Gamow.—8. Our address in the universe: Margaret Geller and John Huchra.

Essays 1 and 3 were published "in slightly different form" in the *American Scholar*, summer 1993 and winter 1990, and no. 8, in the *Harvard Magazine*, Jan./Feb. 1994.

Herbst, Klaus D. *Die Entwicklung des Meridiankreises, 1700–1850; Genesis eines astronomischen Hauptinstrumentes unter Berücksichtigung des Wechselverhältnisses zwischen Astronomie, Astro-Technik und Technik.* Bassum, Verlag für Geschichte der Naturwissenschaften und der Technik, 1996. 255 p. illus.

Hernschier, Wolfgang. *Ich wollte, ich wäre ein guter Schuhflicker ... Das unglückliche Leben des bayerischen Astronomen Johann Nepomuck Fischer (1749–1805).* Eine dokumentarische Biographie. Bassum, Verlag für Geschichte der Naturwissenschaften und der Technik, 1997. 77, xxiii p. illus.

Hey, Anthony J. G., *and* Patrick Walters. *Einstein's mirror.* Cambridge, New York, Cambridge University Press, 1997. 291 p. illus. (part col.), facsimis. (part col.), maps, ports.

Hochsieder, Peter, *and* Doris Knösel. *Les taules a Menorca; un estudi arqueo-astronomic.* Mahon, Institut Menorquí d'Estudis, 1995. 325 p. illus., maps, plans. (Treballs del Museu de Menorca, 14)
Original title: *Die Taules von Menorca, eine archäoastronomische Forschung.*

Hofer, Herbert G. *Höhlen als frühe Observatorien; die Entschlüsselung des Labyrinths?* Heimsheim, Jost-Jetter, 1996. 64 p. illus.

Instruments of science. An historical encyclopedia. Editors, Robert Bud, Deborah Jean Warner. New York, The Science Museum, London, and the National Museum of American History, Smithsonian Institution, in association with Garland Pub., 1998. xxv, 709 p. illus., facsimis., ports. (Garland encyclopedias in the history of science, v. 2) (Garland reference library of social science, v. 936)

Among the articles of interest to historians of astronomy and astrophysics are the following:
Armillary sphere; Astrolabe; Astrolabe, mariner's; Charge-coupled device; Chronograph; Chronometer; Clock, regulator; Cometarium; Comparator, astronomical; Corona, instruments for observing the; Cosmic ray detector; Cross-staff; Diffraction grating and ruling engine; Dividing engine; Equatorium; Globe; Gravitational radiation detector; Heliostat; Interferometer; Nocturnal; Octant; Orrery; Photometer; Photomultiplier; Photon counter; Planetarium; Quadrant; Sextant; Solar neutrino detector; Spectrometer, gamma ray; Spectroscope (early); Spectroscope, astronomical; Sun-dial; Telescope (early); Telescope (modern); Telescope, new technology; Telescope, radio; Telescope, x-ray; Torquetum; Torsion balance; Transit circle; and Transit instrument.

Kusukawa, Sachiko. *The transformation of natural philosophy: the case of Philip Melanchthon.* Cambridge, New York, Cambridge University Press, 1995. xv, 246 p. illus., facsimis., ports. (Ideas in context, 34)

The author gives much attention to Melanchthon's interest in astronomy and astrology; see particularly chapters 4 and 5, "The Providence of God" (p. 124–173) and "The Construction of Orthodoxy" (p. 174–200).

Leopardi, Giacomo. *Storia della astronomia dalla sua origine fino all'anno 1813. Con uno scritto di Armando Massarenti. Un'appendice di Laura Zampieri.* Milano, La Vita felice, 1997. 459 p. (Philobiblon, 2)

M. N. Saha Centenary Seminar, *Calcutta, 1992.* The glittering spectrum of Meghnad Saha. Proceedings of M. N. Saha Centenary Seminar, 28–30 October 1992. Edited by Jayanta Basu. Calcutta, Saha Institute of Nuclear Physics, 1994. 162 p., [8] leaves (part fold.). illus., port.

Partial contents: Meghnad Saha and astrophysics. Dutta-Roy, B. Meghnad Saha: his journey to the physics of the stars. Bhattacharyya, J. C. Contributions of M. N. Saha in astrophysics. Abhyankar, K. D. Meghnad Saha and cosmic abundances of elements.—Meghnad Saha and atmospheric & space physics. Sen, A. K. Millimeter waves: solar emission and various applications. Dasgupta, A. Radio astronomy and atmospheric effects. Abstract.—Meghnad Saha and river research & calendar reform. Bandyopadhyay, A. Professor M. N. Saha's contribution to calendar reform.—Socio-economic role of Meghnad Saha. Mukherjee, H. N. Reminiscences on Meghnad Saha. Abstract. [Full paper in Bengali]—Appendices. Appendix I. Bio-data of Meghnad Saha. Appendix II. Scientific papers of Meghnad Saha.

Norton, O. Richard. *Rocks from space: meteorites and meteorite hunters.* Illustrated by Dorothy S. Norton. 2d ed. Missoula, Mont., Mountain Press Pub. Co., 1998. 447 p., [8] p. of plates. illus. (part col.), maps, ports. (part col.)

Includes chapters on meteorite showers, the Tunguska event and the Sikhote-Alin fall, Meteor Crater in Arizona, the discovery and recovery of famous meteorites, Harvey Nininger, and Robert Haag, "the meteorite man." There is also a "Selected List of Authenticated Impact Craters Worldwide" (p. 411–413).

Observatoire astronomique de Strasbourg. Publications. Série Astronomie et sciences humaines. no 13. Strasbourg, 1996. 136 p. illus., music, ports.

Contents: 22ième réunion. Dollfus, A. La grande lunette de Meudon. Proust, D. L'harmonie des sphères. Florsch, A. Les cadrans solaires en Alsace: le vrai, le faux et l'aberrant.—21ième réunion. Andrillat, H. L'univers, de l'antiquité à nos jours. Jaschek, C. Les réunions salmantines d'"Astronomie dans la culture."—20ième réunion. Becker, C. Réflexions épistémologiques sur le temps ou les temps.—19ième réunion. Canguilhem, B. Les rythmes biologiques: de la biologie moléculaire au comportement.

Oechslin, Ludwig. *Astronomische Uhren und Weltmodelle der Priestermechaniker im 18. Jahrhundert.* Neuchâtel, A. Simonin, 1996. 2 v. + portfolio. illus.

The text and catalog volumes are accompanied by a portfolio containing mechanical drawings.

Olson, Roberta J. M., and Jay M. Pasachoff. *Fire in the sky: comets and meteors, the decisive centuries, in British art and science.* Epilogue by Colin Pillinger. Cambridge, New York, Cambridge University Press, 1998. xiv, 369 p., [32] p. of plates. illus. (part col.), facsimis. (part col.), ports. (part col.)

Oriental astronomy from Guo Shoujing to King Sejong. Proceedings of an international conference, Seoul, Korea, 6–11 October 1993. Edited by Nha I.-S., F. Richard Stephenson. Seoul, Yonsei University Press, 1997. 401 p. illus., maps, plans, ports. (part col.)

Contents: 1. Introductory lectures. Nha, I.-S. Opening address. Stephenson, F. R. The impact of Guo Shoujing and King Sejong on oriental astronomy.—2. Astronomers and history. Bo, S. An outline of Guo Shoujing's astronomical work. Park, S.-R. King Sejong: astronomer-king of Korea, 1397–1450. Cui, S. Astronomy and culture in China. Wu, X. Remarks on the history of astronomy during the period of King Sejong. Kim, O. K. Yi Soonji, a prominent court astronomer of King Sejong. Du, S. Chinese astronomy after Guo Shoujing to the early days of the Ming dynasty.—3. Observatories and astronomical boards. Xu, Z.-T. Two observatories at the beginning of the Ming dynasty. Li, Q. Beijing Astronomical Observatory in the Yuan dynasty. Luan, X.-L., and S. Bo. Yuanzhou ancient observatory as a time service station. Yu, K.-L. A brief history of the Bureau of Astronomy in the Koryo and early Chosön dynasties.—4. Comparative studies. Park, S.-R. Pak An-Gi and the Japanese calendar of 1683 by Shibukawa Harumi. Chen,

K.-Y. The east-west interaction: a background to oriental astronomy in the thirteenth-fifteenth centuries. Chen, J.-J. Comparative research between the Huihui calendar, Chiljöngsan Oepiön and Qizheng Tuibu. Yano, M. Distance of planets in Indian astronomy. Rahimi, M. F. Abu-Rayhan-Birouni, an outstanding Iranian astronomer of the 11th century. Jiang, X. The contact of Chinese and Islamic astronomy in the 13th century.—5. Observation records and modern scientific applications. Hasegawa, I. Daytime fireballs recorded in China and Japan. Kim, Y. Statistics of astronomical records in Korea during AD 1200–1450. Stephenson, F. R. Accuracy of medieval Chinese measurements of lunar and solar eclipse times. Liu, C., and F. R. Stephenson. Some results obtained from a study of the 800 lunar records in the Yuan-shi.—6. Instrumentations. Nha, I.-S. Refined revivals of Guo Shoujing's instruments and the invented instruments made for King Sejong's royal observatory. Leung, K.-C. Ancient astronomical instruments in China. Li, Q. Application of pinhole imaging principle in Guo Shoujing's measurements of tropical year. Situ, D., and S. Yi. The gnomon in the Yuan dynasty and Dengfeng observatory. Yi, S. Re-elaboration on scaphe sundial and scaphe.—7. Star atlases and catalogues. Pan, N. Differences between the constellations as envisaged in ancient China and Korea, and their relations around the Middle Ages. Lee, Y.-S., and K.-K. Park. Computer scanning techniques applied to the 1395 stone star map Ch'önsang Yölcha Bunya Jido. Sun, X., S. Bo., and J. Kistemaker. The Tian Wei Hui Chao star catalogue of the early Ming. Chen, M.-D. A preliminary study of two star charts from the early Ming dynasty of China. Nishiyama, M. Myanmar (Burmese) constellations on old Myanmar sky charts.—8. Timekeeping and calendar making. Nam, M.-H., and S.-W. Jeon. Timekeeping systems of early Chosön dynasty. Hua, T. The water clock of the Ming dynasty. Guo, S. Comparison between Korean Jade Clepsydra and Chinese clepsydras. Lee, E.-H. The Ch'iljöngsan Naepiön, an adopted version of the Soushi-li and Datong-li. Kang, Y.-W., and E.-H. Lee. Cross-index of dates used in Chinese, Korean and Japanese calendars for the period, 1401–1450. Okada, Y. The birth and the spread of “kana” calendar. Leung, K.-C., and Y. Lu. The Tianyuan Fawei by Bao Yunlong.—9. Concluding remarks and editor's note. Chen, K.-Y. Concluding remarks. Nha, I.-S. Editor's note: romanization of Chinese, Korean and Japanese terms used in the text.—Appendix. Cross index of dates used in Chinese, Korean and Japanese calendars for the period, 1401–1450.

Papers on the Madrid Codex. Edited by Victoria R. Bricker and Gabrielle Vail. New Orleans, Middle American Research Institute, Tulane University, 1997. 196 p. illus. (Middle American Research Institute. Publication 64)

Contents: 1. Bricker, V. R. The structure of almanacs in the Madrid Codex.—2. Nagy, C. L. von. Some comments on the Madrid deer-hunting almanacs.—3. Vail, G. The deer-trapping almanacs in the Madrid Codex.—4. Bill, C. R. The roles and relationships of God M and other black gods in the codices, with specific reference to pages 50–56 of the Madrid Codex.—5. Graff, D. H. Dating a section of the Madrid Codex: astronomical and iconographical evidence.—6. Bricker, V. R. The “calendar-round” almanac in the Madrid Codex.

Peperoni, Laura, and Marina Zuccoli. *Vultus Uraniae. Raffigurazioni di Urania nella Biblioteca del Dipartimento di Astronomia*. Bologna, Biblioteca Universitaria di Bologna, 1996. 32 p. facsimis.

Italian and English in parallel columns.

Contents: La tradizione mitologica. The mythological tradition.—Trattati di astronomia dedicati ad Urania. Astronomical treatises named after Urania.—Jan Hevelius.—Urania nell'iconografia astronomica. Urania in astronomical iconography.—Effeemeridi. Ephemerides.—Le suggestioni di Urania nei secoli. Urania's suggestions during the centuries.

Philibert, Myriam. *Stonehenge et son secret*. Monaco, Éditions du Rocher, 1994. 340 p. illus., plans. (Brocéliande)

Contents: Soleil levant sur la Heel Stone.—1. ptie. Stonehenge face à l'histoire. La genèse du site. Les aménagements successifs. Les années obscures. Les travaux récents.—2. ptie. Stonehenge et l'espace-temps. Stonehenge et les îles Britanniques. Stonehenge et son temps. Stonehenge, terre sacrée. Le calendrier de Stonehenge.—3. ptie. Le message de Stonehenge. Les symboles. Les légendes. Initiation et classes sociales. L'initiation supérieure et la tradition.—Un an et un jour. Annexe. Glossaire. Bibliographie. Index géographique.

Problemy prostranstva, vremeni, dvizheniiā. Sbornik trudov IV Mezhdunarodnoi konferenčii, posviashchennoi 400-letiiu Dekarta i 350-letiiu Leibnisa. (Sentsabr' 23–29, 1996, Sankt-Peterburg, Rossiia.) t. 1. Sankt-Peterburg, Rossijskaya akademija nauk, OAO "SPb-Tekhnologija," 1997. 200 p. illus.

Contents: ch. 1. Istoriko-filosofskie voprosy estestvoznaniiā. Nevskaia, N. I. Dekart, Leibniss i Peterburgskaya astronomicheskaya shkola XVIII v. Nizovsev, V. V. Kartezianstvo i problemy sovremennoi fiziki. Kuznečsova, A. B. Dekart i pervye shagi N'iutonianstva v Rossii. Baloshina, N. Iū. Filosofskaya doktrina G. Leibnisa i ee znachenie dlia stanovlenija nauchnoi myсли v Rossii. Malyshev, Iū. M. Kartina mira: kul'turno-istoricheskoe mnogoobrazie i problema sinteza. Zhukov, L. V. Nekotorye trudnosti, sviazannye s vosprisjatiem prostranstvenno-vremennykh otnoshenii studentami pedagogicheskogo universiteta.—ch. 2. Aberračija sveta. Parshin, P. F. Klassicheskaya teoriā aberracii sveta i effekt San'faka. Tolchel'nikova, S. A. Geometriā i zvezdnaja aberracija. Tolchel'nikova-Murri, M. S. Ch. Zvezdnaja aberracija pri vozrosshei tochnosti nabliudeni i pri bol'sikh skorostikh dvizhenii na nabliudateli. Tolchel'nikova-Murri, S. A., and S. N. Sadzhakova. Zvezdnaja aberracija v uchebnikakh fiziki i astronomii. Murri, S. A. K voprosu o meste geometrii v estestvoznanii.—ch. 3. Astronomija. Bogdanov, V. I. K voprosu ob anomal'nom smeshchenii perigeliā orbit Merkuriā. Renshaw, C. E., and W. M. Kallfelz. The gravitational potential for a moving observer, the perihelion shift of Mercury and photon deflection. Iürkina, M. I. Effekt Eilera i nebesnomenkhanicheskie vyvody. Karpinskii, V. N. Sistema struktur na solntse i nieierarkhichnost'. Browne, P. F. Zero-point radiation and anomalous astrophysical redshifts. Renshaw, C. E. Pulsar timing, superluminal jets and the special theory of relativity. Bursha, M., G. V. Dem'janov, and M. I. Iürkina. Ob opredelenii modeli zemli—obshchego zemnogo ellipsoida. Smirnov, B. N., and S. A. Tolchel'nikova-Murri. Mozhno li opredelit' inersial'noe dvizhenie solnechnoi sistemy, opiraias' na ideiu Maksvella?

Each paper is preceded by an abstract in English.

Razvoj astronomije kod Srba. Development of astronomy among Serbs. Edited by M. S. Dimitrijević, J. Milogradov-Turin and L. C. Popović. Beograd, 1997. 275 p. illus., ports. (Publikacije Astronomiske opservatorije u Beogradu, sv. 56)

Proceedings of a conference held Apr. 7–9, 1997, in Belgrade. Each paper is followed by an abstract in English.

Contents: Kanazir, D. Proslava 110 godina Astronomiske opservatorije 7. 4. 1997.—Dimitrijević, M. S. 110 godina Astronomiske opservatorije.—Dimitrijević, M. S. Razvoj astronomije kod Srba od početka XVIII veka do prvog svetskog rata.—Tadić, M. Nacrt za katalog naših sunčanika.—Francisti, J. Prvi članak u srpskoj štampi o pojavi Halejeve komete na našem nebu.—Trajkovska, V., and S. Ninković. Lokijerova "Astronomija" kod Srba u drugoj polovini XIX veka.—Đokić, M. Neke primedbe o osnivačkom aktu opservatorije Velike škole u Beogradu.—Milogradov-Turin, J. Jedan prilog istoriji Katedre z astronomiju Univerziteta u Beogradu.—Popović, L. Č. Razvoj i aktivnosti Astronomskog društva "Ruder Bošković."—Francisti, J. Astronomsko društvo "Novi Sad"—ADNOS.—Babović, V. Multidisciplinarnost u razvoju Belerofonta.—Salim, S. Astronomija u Istrazivačkoj stanci Petnica.—Gajić, D. Ž. Astronomija i astrofizika na univerzitetu u Nišu.—Sekulić, M. Astronomsko društvo "Alfa"—Niš.—Naumovski, K., and M. Bracić. Astronomsko društvo u Zrenjaninu.—Dimitrijević, M. S. Đorđe Stanojević prvi srpski astrofizičar.—Milićević, V. Naučni rad Milutina Milankovića.—Arsenijević, J., A. Kubičela, and A. Oskanjan. Oskanjan—osnivanje i rad grupe za astrofiziku.—Popović, G. M. Naučni i stručni rad Pera M. Đurkovića.—Pakvor, I. Naučna i stručna delatnost mr Milana Mijatova.—Đorđević, R. Milankovićeve filosofske ideje i njihova aktuelnost.—Jovanović, B. D. Nastava iz astronomije kod nas, I.—Tomić, A. Takmičenje učenika iz astronomije u Srbiji 1965–1996. godine.—Milogradov-Turin, J. Astronomija na seminarima za nastavnike u Srbiji.—Dačić, M., and Z. Cvetković. O posmatranjima zvezda DS programa na Meridijanskom krugu u Beogradu.—Kubičela, A., and J. Arsenijević. Ekspedicija Astronomiske opservatorije za posmatranje potpunog pomračenja Sunca 1961.

Reeves, Hubert. Intimes convictions. Entretiens avec André Comte-Sponville, Sylvie Bonnet, Véronique Chica, Charles Juliet, François Bon, Gilles Derome. Vénissieux, Éditions Paroles d'aube, 1997. 91 p. ports.

Contents: Rao, N. K. Frontispiece: Sun temple at Modhera.—Krishan, V. A dedication: Narayana Chandra Rana.—Abhyankar, K. D. Foreword.—Sarma, K. V. The Pañcasiddhāntikā of Varāhamihira: a puzzling problem in its presently available text.—Ramasubramanian, K. Model of planetary motion in the works of Kerala astronomers.—Naik, P. C., and L. Satpathy. Samanta Chandra Sekhar [1835–1904]: the great naked eye astronomer.—Holay, P. V. The distinctive features of Rik-Jyotisha.—Abhyankar, K. D. Antiquity of the vedic calendar.—Abhyankar, K. D. On the Pre-Siddhantic evolution of the Indian calendar.—Sharma, S. D. Development of Pañcanga from vedic times upto the present.—Holay, P. V. Vedic astronomers.—Sidharth, B. G. The calendric astronomy of the vedas.—Ghanekar, B. Some thoughts on Bhadra Chowkon and Ankapasha in Indian mathematics.—Ratna, V. An improved gnomon.

A color photograph of the sun temple at Modhera is reproduced on the outside front cover of the issue.

Articles, Including Essays in Books and Papers in Proceedings

Abhyankar, Krishna D. The origin of the solar system. In Bharatiya Jyotir Vijyan Parishad. Bulletin of the Astronomical Society of India, v. 26, June 1998: 339–348. illus.

“This is a historical review of the development of the ideas about the origin of the solar system starting from the nebular hypothesis of Kant and Laplace.”

About Samuil Aronovich Kaplan (1921–1978). *Astrophysics and space science*, v. 252, no. 1/2, 1997: 19–21. A portrait of Kaplan appears on the page facing p. 1 of the issue.

About Solomon Borisovich Pikel'ner (1921–1975). *Astrophysics and space science*, v. 252, no. 1/2, 1997: 15–18.

A portrait of Pikel'ner appears on the page facing p. 1 of the issue.

Albani, Matthias, and Uwe Glessmer. Un instrument de mesures astronomiques à Qumrân. *Revue biblique*, t. 104, janv. 1997: 88–115. illus.

“This unique object found at Qumrân in 1954, is an instrument which can measure the solstitial and equinoctial points and the horizontal direction of the sun by different circles with graduation in correspondence to seasons. This allows time-keeping of fractions of the day in form of watches or seasonal hours. Knowledge of the ratio between length of day to night builds the basis for astronomical observations as well as for practicability of 364 day-calendars known from Qumrân Texts.”

Albani, Matthias. “Das Werk seiner Hände verkündigt die Feste”. Die doxologische Bedeutung des Sonnenlaufes in Psalm 19. In *Gottes Ehre erzählen. Festschrift für Hans Seidel zum 65. Geburtstag*, hrsg. von Matthias Albani und Timotheus Arndt. Leipzig, Thomas Verlag, 1994. p. 237–256. illus.

Aller, Lawrence H. Early days of planetary nebular theory. In International Astronomical Union. Symposium, 180th, Groningen, 1996. Planetary nebulae. Proceedings of the 180th symposium of the International Astronomical Union, held in Groningen, the Netherlands, August 26–30, 1996. Edited by H. J. Habing and H. J. G. L. M. Lamers. Dordrecht, Boston, Kluwer Academic Publishers, 1997. p. 3–9.

Andrillat, Henri. L'astronomie égyptienne. In Académie royale de Belgique. *Classe des sciences. Bulletin*, 6. sér., t. 8, no 1/6, 1997: 71–89. illus.

Bares, Juan de D. El “reto de Platón.” In La Ciencia de los filósofos. Juan Arana (ed.). Sevilla, Universidad de Sevilla, Departamento de Filosofía, 1996. (Thémata, revista de filosofía, no. 17) p. 27–43.

Abstract in English.

Barham, Jeffrey. The Leonids from Cambridge in 1799. In British Astronomical Association, *London*. Journal, v. 108, June 1998: 136.

Letter quoting a recently unearthed report published in the *Cambridge Chronicle* of Nov. 23, 1799.

Basello, Gian P. Giovanni Schiaparelli: storico dell'astronomia e uomo di cultura. Giornale di astronomia, v. 23, dic. 1997: 30–31.

Briefly summarizes proceedings of a “seminario di studi” on Schiaparelli and his interest in the astronomy of the ancient Orient, held May 12–13, 1997, at the Brera Observatory. Papers were presented by Hermann Hunger and Salvo De Meis, Antonio Panaino, Agnese Mandrino, Luigi Cagni, Maria Casaburi, Guido Pellegrini and Giuseppe Bezza, and Raffaella Simili.

Bejarano Escanilla, Ingrid. Orientaciones por astros y por vientos. In Al-Andalus y el Mediterráneo. Barcelona, Lunwerg Editores, 1995. p. 259–276. col. illus., facsimis. (part col.)

Other illustrations relating to the history of astronomy can be found elsewhere in the volume, on p. 50, 60, 81, 82, 84, 128, 129, 134, 136, 137, 157, 171, 172–173, 187, 208, 211, 231, 250, 290, 305, 306, 307, and 313.

Blitzstein, William, and Kwan-Yu Chen. Frank Bradshaw Wood, 1915–1997. *Astronomy & geophysics*, v. 39, Apr. 1998: 37. col. port.

“Fellow of the RAS, researcher and educator; advocate, nationally and internationally, of observational astronomy.”

Bonheim, Günther. ward Jch dero wegen Gantz Melancolisch. Jacob Böhmes *Heidnische gedancken* bei Betrachtung des Himmels und die Astronomie seiner Zeit. *Euphorion*, 91. Bd., 1. Heft, 1997: 99–132. (Beiträge zu Forschungsproblemen)

Bonnell, J. T., and R. W. Klebesadel. A brief history of the discovery of cosmic gamma-ray bursts. In *Gamma-ray bursts*. 3rd Huntsville symposium, Huntsville, AL October 1995. Editors: Chryssa Kouveliotou, Michael F. [i.e. S.] Briggs, Gerald J. Fishman. pt. 2. Woodbury, N.Y., AIP Press, 1996. (AIP conference proceedings, 384) p. 977–980. illus.

Brack-Bernsen, Lis. In memoriam: Olaf Schmidt (1913–1996). *Historia mathematica*, v. 24, May 1997: 131–134. port.

“Bibliography of Olaf Schmidt in History of Science”: p. 134.

Bricker, Harvey M., and Victoria R. Bricker. More on the Mars table in the Dresden Codex. *Latin American antiquity*, v. 8, Dec. 1997: 384–397. illus.

Brind'Amour, Pierre. L'horoscope de l'avènement de Néron. In *Mélanges offerts en hommage au Révérend Père Rodrigue LaRue, OFM*. Sous la direction de Florent Tremblay. Trois-Rivières, Université du Québec à Trois-Rivières, 1991. (Cahiers des études anciennes, no 25) p. 135–151.

Brück, Mary T. Mary Ackworth Evershed née Orr (1867–1949), solar physicist and Dante scholar. *Journal of astronomical history and heritage*, v. 1, June 1998: 45–59. illus., ports.

Brunet, Jean P., Robert Nadal, and Claude Vibert-Guigue. The fresco of the cupola of Qusayr 'Amra. *Centaurus*, v. 40, no. 2, 1998: 97–123. illus.

“Paintings of the baths of Qusayr 'Amra (Jordan), being copied at present, include a *calarium* topped by a cupola on which the heavens are represented.”

Bucciantini, Massimo. A difficult legacy: Galileo and the Galilean Collection between myth and history. *Nuncius*, anno 12, fasc. 2, 1997: 311–328.

“The principal aim of this article is to reveal the political and cultural significance of the constitution of the Galilean Collection as part of a battle to rehabilitate Galileo as a Copernican philosopher and scientist.”

Burns, William E. Whigs, astrologers and millenarians. *Center & Clark newsletter*, no. 31, spring 1998: 4–5. illus.

Describes his research at the William Andrews Clark Memorial Library (UCLA), which involves a study of “astrology and politics in Restoration England.” He finds “that millenarianism and astrology were both important parts of the culture of Whig politics and that inclusive histories of Whig ideology must address the role played by systems of thought which do not fit into the modern definition of political rationality.”

Caplan, James. Historical conservation at the Marseille Observatory. *Mitteilungen zur Astronomiegeschichte*, Nr. 12, Juni 1998: 1.

Castor, John J. A celebration of the contributions of Art Cox to stellar pulsation interpretations. In *A Half century of stellar pulsation interpretations: a tribute to Arthur N. Cox*. Proceedings of a conference held in Los Alamos, New Mexico, 16–20 June 1997. Edited by P. A. Bradley and J. A. Guzik. San Francisco, Astronomical Society of the Pacific, 1998. (Astronomical Society of the Pacific conference series, v. 135) p. 1–11. illus., port.

Creese, Mary R. S. Chapter 10. Observers, "computers," interpreters, and popularizers: women in astronomy. In *her Ladies in the laboratory? American and British women in science, 1800–1900; a survey of their contributions to research*. Lanham, Md., Scarecrow Press, 1998. p. 225–249.

"Bibliography of Papers by American and British Women in Scientific Periodicals, 1800–1900.

Part 2. Mathematical, Physical, and Earth Sciences. *Astronomy*: p. 407–412. Some of the women whose writings are included in this section of the bibliography are discussed in chapter 8, "Mathematicians and Statisticians, Mainly of the 1890s, but Remembering Mary Somerville."

Cruz, Víctor de la. Los nombres de los días en el calendario zapotec *piye* en comparación con el calendario nahua. In *Estudios de cultura náhuatl*. v. 25; 1995. México, D.F., Universidad Nacional Autónoma de México, Instituto de Investigaciones Históricas. p. 149–176.

Darnell, Per B. Bothkampobservatoriet. *Astronomisk tidsskrift*, årg. 31, mars 1998: 30–33. illus. (part col.)
"Astronomi i de tidligers danske landområder syd for grænsen."

Darnell, Per B. Professor Schrader og hans store teleskoper. *Astronomisk tidsskrift*, årg. 31, juni 1998: 25–28. facsimis., port.
About Johann Gottlieb Friedrich Schrader (1763–1832?).

Débarbat, Suzanne V., Josette Alexandre, and Nandou Dalies. Unpublished Messier celestial maps for representing the trajectory of comets. In *International Conference on the History of Cartography, 16th, Vienna, 1995. Abstracts; curricula vitae*. Edited by Ingrid Kretschmer. Vienna, 1995. p. 76.

Dekker, Elly, and Gerard L'E. Turner. An unusual Elizabethan silver globe by Charles Whitwell. In *The Antiquaries journal*. v. 77; 1997. London, Society of Antiquaries of London. p. 393–401. illus.

"The single sphere is constructed out of two silver hemispheres which are joined at the equator by three bayonet catches ... The outer surface is engraved with a map of the world; at least 900 holes of different sizes have also been drilled into the surface from the outside, representing the starry sky. Evidently this globe was intended to be used whole as a terrestrial sphere as well as in two parts in order to see, from the inside, the stars against a background light, exactly as seen from the Earth ..."

The globe, from the Bonnefoy collection, "was acquired by Sir James Caird, who presented it to the National Maritime Museum."

Dick, Steven J. Observation and interpretation of the Leonid meteors over the last millennium. *Journal of astronomical history and heritage*, v. 1, June 1998: 1–20. illus., ports.

Dimitrijević, Milan S. Milutin Milanković in Science Citation Index 1946–1996. *Bulletin astronomique de Belgrade*, no 156, 1997: 205–241.

Includes a listing of 522 citations, arranged chronologically under references to the 17 works by Milanković to which they relate.

Dobbins, Thomas A., and Richard M. Baum. Observing a fictional Moon. *Sky & telescope*, v. 95, June 1998: 105–109. illus. (part col.), ports. (Observer's log)

"The unorthodox views of an eccentric astronomer [William Henry Pickering] were immortalized in a turn-of-the-century science-fiction classic" by H. G. Wells.

Dobbins, Thomas A., and Richard M. Baum. O'Neill's Bridge remembered. *Sky & telescope*, v. 95, Jan. 1998: 105–108. illus. (part col.), group port. (Observer's log)

"His 'confirmation' and continued belief that the Moon harbored a natural bridge ultimately damaged the otherwise distinguished reputation of a skilled lunar observer" (Hugh Percy Wilkins).

Dobronravin, P. P. Vospominaniia ob Andree Borisoviche Severnom. *Izvestiia Krymskoi astrofizicheskoi observatorii*, t. 92, 1995: 8–11.

An English translation, "Recollections of Andrei Borisovich Severnyi," appears in the *Bulletin of the Crimean Astrophysical Observatory*, v. 92, 1995, p. 4–6.

Dossier cadans solaires. *L'Astronomie*, v. 112, fév. 1998: 38–60. illus., maps.

Contents: Savoie, D. L'ancien cadran solaire de la colonne Catherine de Médicis à Paris.—Valdés Carracedo, M. M. Les chemins de Saint-Jacques et les cadans canoniaux.—Cornec, J. P. L'inventaire des cadans solaires français: la base de données informatique.—Hibon, M. Bonnes feuilles; ou, "Un cadran solaire original."

Another illustration appears on the outside front cover of the issue (caption on p. 37).

Dumont, Simone, and Suzanne V. Débarbat. Two scientists as cartographer pilgrims in Central and Eastern Europe: Delisle and Cassini. In *International Conference on the History of Cartography, 16th, Vienna, 1995. Abstracts; curricula vitae*. Edited by Ingrid Kretschmer. Vienna, 1995. p. 42.

Dworetsky, Michael M., and S. J. Fossey. Lunar occultations of Jupiter and Saturn, and the star of Bethlehem. *Observatory*, v. 118, Feb. 1998: 22–24.

In connection with Molnar's proposal of two "astrologically significant lunar occultations of Jupiter in Aries on 6 BC March 20 and April 17" the authors "report the identification of further contemporary astronomical events, a pair of occultations of Saturn in Pisces, which may be capable of astrological interpretations as 'omens' supporting Molnar's hypothesis."

Dwyer, Christopher. Laplace—the supreme calculator. *Astronomy now*, v. 12, May 1998: 52–53. col. illus., port.

"Laplace played an important part in the science of astronomy with his mathematical approach to solving problems."

Ehrenstein, David. Astrophysicist dies in plane crash. *Science*, v. 279, Jan. 2, 1998: 22. port.
On the death of David Schramm.

Engström, Jan. and Panu Nykänen. New interpretations of Viking Age weathervanes. In *Vitterhets, historie och antikvitets akademien, Stockholm. Fornvännen, tidskrift för svensk antikvarisk forskning*, årg. 91, häfte 3, 1996: 137–142.

"The famous Viking Age weathervanes which have been found in Sweden, Norway and Finland are re-examined. The authors claim that weathervanes were not merely *objets d'art* or symbols of rank but also played an important part as navigation instruments. Weathervanes were used as angle measuring devices for estimating the height of the sun or stars above the horizon. Later on the weathervane was adopted by the Christian Church and its original use was forgotten."

Kelter, Irving A. A Catholic theologian responds to Copernicanism: the theological *Judicium* of Paolo Foscarini's *Lettera*. Renaissance and Reformation, v. 21, spring 1997: 59–70.

“This paper is an in-depth analysis of the Carmelite Paolo Foscarini's role in the debate on Copernican cosmology in the early seventeenth century. Using as a point of departure the 1616 *Judicium* issued by the Catholic Church against Foscarini's pro-Copernican treatise, this analysis will lead to a clearer understanding of the discussions on the fluidity or hardness of celestial bodies, and more generally on the conflicting Biblical and Copernican models.”

Milbrath, Susan. Decapitated lunar goddesses in Aztec art, myth, and ritual. *Ancient Mesoamerica*, v. 8, fall 1997: 185–206. illus.

“Aztec images of decapitated goddesses link the symbolism of astronomy with politics and the seasonal cycle. Rituals reenacting decapitation may refer to lunar events in the context of a solar calendar, providing evidence of a luni-solar calendar. Decapitation imagery also involves metaphors expressing the rivalry between the cults of the sun and the moon. Huitzilopochtli’s decapitation of Coyolxauhqui can be interpreted as a symbol of political conquest linked to the triumph of the sun over the moon. Analysis of Coyolxauhqui’s imagery and mythology indicates that she represents the full moon eclipsed by the sun. Details of the decapitation myth indicate specific links with seasonal transition and events taking place at dawn and at midnight. Other decapitated goddesses, often referred to as earth goddesses with ‘lunar connections,’ belong to a complex of lunar deities representing the moon within the earth (the new moon). Cihuacoatl, a goddess of the new moon, takes on threatening quality when she assumes the form of a *tzitzimime* attacking the sun during a

solar eclipse. The demonic new moon was greatly feared, for it could cause an eternal solar eclipse bringing the Aztec world to an end."

English summary.

Thompson, Richard. Planetary diameters in the *Surya-siddhanta*. *Journal of scientific exploration*, v. 11, summer 1997: 193–200.

"This paper discusses a rule given in the Indian astronomical text *Surya-siddhanta* for computing the angular diameters of the planets. By combining these angular diameters with the circumferences of the planetary orbits listed in this text, it is possible to compute the diameters of the planets. When these computations are carried out, the results agree surprisingly well with modern astronomical data. Several possible explanations for this are discussed, and it is hypothesized that the angular diameter rule in the *Surya-siddhanta* may be based on advanced astronomical knowledge that was developed in ancient times but has now been largely forgotten."
